

TypeEdit 2005: the ultimate artistic CAD-CAM solution to efficiently promote your brand identity.

Lyon, France - January 18th 2005 – Vision numeric releases the latest version of its flagship product: TypeEdit 2005. TypeEdit Artistic CAD/CAM Software is the international gold standard linking graphic arts to the industry with the typographic engraving industry. This new 2005 version is dedicated to helping professional jewellers, engravers, mold, tool and sign makers save time and reduce costs, so that they increase their productivity while still maintaining a high level of quality.

TypeEdit 2005 is packed with new functions, wizards and amazing new capabilities. Professionals can now create faster and better using these intuitive and powerful new features, including Inlaid work, Loop eraser, Ridge function, specialized toolpaths like Prismatic letters, Panelling, a parametric Construction Tree and the Wrapping function.

For more than 15 years, companies from all around the world have been using TypeEdit and contributing to its advancement and innovation thanks to new requirements that arise from their evolving needs.

Discover a new offer along with this TypeEdit 2005 version. To respond to ever increasing customization demands, Vision numeric segmented TypeEdit into 4 distinct packages divided by industry. JEMS represents this new offer specifically targeted for the Jewelry, Engraving, Mold and Sign Industries; and there is a JEMS package tailored to each of these industries.

TypeEdit 2005 more easily than ever fosters advanced graphic design and imposes itself naturally as the most reliable product among existing CAD/CAM software solutions. This new customized and targeted offer is just one more example of Vision numeric's dedication to satisfying customer demands.

About VISION NUMERIC

Vision numeric, a French company established in 1988, has assigned itself a special mission from the beginning: to build the bridge between the world of graphical arts and the environment of industrial engraving. Marking, identifying and decorating are the different needs expressed by professionals. Vision numeric has developed the solution in an environment that focuses on communication through industrial parts. With over 25.000 licenses sold worldwide, Type3 product family is recognized today by professionals as the unavoidable solution, whether they are working in a mechanical or laser environment. www.type3.com
